SUMMARY

Full Stack Engineer with 2+ years of professional software development experience. I build and deploy SaaS products, REST APIs and automation workflows, and integrate LLMs, RAG and agents into applications. I work with Python, FastAPI, Django, React, TypeScript, PostgreSQL, Docker and Linux. Experienced in authentication, third-party API integrations, production troubleshooting and remote collaboration with international clients.

SKILLS

Core languages: Python, TypeScript, JavaScript, SQL, PHP, Java

Backend, APIs & data: FastAPI, Django, PostgreSQL, REST APIs, JWT, Redis, Flask, Node.js, OAuth 2.0, SQLAlchemy, MySQL, SQLite, ChromaDB

Frontend: React, Next.js, Vite, Tailwind CSS, HTML/CSS, WordPress

AI & automation: LLM integration, RAG, LangGraph, n8n, AI agents, Ollama, LlamaStack, Make, GoHighLevel, Webhooks, PySpark

Infrastructure & delivery: Docker, Linux, Git/GitHub, Vercel, Docker Compose, Coolify, Traefik, Railway, AWS (EC2, S3, RDS), CI/CD, Agile / Scrum

Testing & security: pytest, Unit & integration testing, bcrypt, TOTP 2FA, OWASP Top 10

EXPERIENCE

Coordenadas.co

Aug 2025 — Present

Full Stack Developer · Bogotá, Colombia (Remote)

- Unified two tools that forced duplicate data entry between payroll and tax withholding into Bikans, now in production with two-factor authentication.
- Delivered an n8n automation agent to integrate QuickBooks Online (OAuth 2.0) in 4 days across 5 phases and 17 tasks, fixing an authentication bug along the way without missing the deadline.
- Automated content distribution for 6 real estate projects into 1 reusable system, personalizing data per contact.
- Built custom plugins and API integrations for U.S. clients across 3 industries, and deployed and maintained project infrastructure on a self-hosted Linux server with Docker, Coolify and Traefik.

Sibartech Technology SAS

Feb 2024 — Aug 2025

Junior Backend Engineer · Colombia

- Developed and maintained backend solutions in Python with Django and FastAPI, using PostgreSQL as the primary database in a real production environment.
- Wrote tests with pytest and containerized services with Docker, taking first steps in testing and DevOps practices.

SELECTED PROJECTS

Bikans: Payroll & Tax SaaS

Coordenadas.co · app.bikans.com

Technologies: React, TypeScript, Django, PostgreSQL, TOTP 2FA

- A Colombian payroll and tax withholding SaaS for accountants. It merged two tools that forced the same data to be entered twice.

IDN Homograph Phishing Detector

Co-authored thesis · USB Bogotá · 2026

Technologies: Python, FastAPI, PostgreSQL, Redis, ChromaDB, RAG, LLM

- An API that takes a URL, an email or an .eml file and returns a phishing verdict with a risk score and the reasons behind it. It targets domains that imitate others with near-identical Unicode characters.

mangel14.dev & Content Engine

This site · mangel14.dev

Technologies: TypeScript, Next.js, React, LangGraph.js, PostgreSQL

- This bilingual portfolio and a LangGraph.js agent that turns notes, documents and links sent over Telegram into blog posts and LinkedIn posts, publishing nothing without my confirmation.

API Auth Gateway

Hackathon · 2025

Technologies: Python, FastAPI, JWT, PostgreSQL, SQLAlchemy, Docker, Railway

- A FastAPI gateway that adds authentication and owner-based access control in front of a university inventory API that had no users.

ETL Pipeline: Dow Jones Sentiment

Public repository · 2025

Technologies: Python, PySpark, ETL, Pandas, Plotly, SQLite, Docker

- A complete PySpark ETL pipeline for sentiment analysis of Dow Jones news, with visualizations and multi-format storage.

EDUCATION

Universidad de San Buenaventura

Jan 2021 — Present

Systems Engineering (in progress) · Bogotá · 10th semester

- Software architecture, distributed systems and networking.
- Thesis co-authored with Juan Sebastián Fandiño Novoa: a multi-agent AI system that detects IDN homograph phishing domains.

COURSES & CERTIFICATES

- Ethical Hacking & Cyber Risk · Universidad Sergio Arboleda, 2025
- Mobile Application Development · Universidad Nacional de Colombia, 2023 — 2024

STRENGTHS

Technical ownership · Troubleshooting under deadline pressure · Async communication · Client communication across industries · Self-directed learning · Remote autonomy
