SUMMARY

Full Stack Developer and AI Engineer with 1+ year of professional software development experience building and deploying SaaS products, REST APIs, and automation workflows, plus AI-powered systems using multi-agent architectures, RAG pipelines, and LLM integrations. Proficient in Python, React, FastAPI, Django, TypeScript, PostgreSQL, LlamaStack, Ollama, ChromaDB, Docker, and Linux. Experienced in authentication, third-party API integrations, production troubleshooting, and remote collaboration with international clients.

SKILLS

Languages: Python, JavaScript, TypeScript, PHP, SQL

Frontend: React, Next.js, Vite, Tailwind CSS, HTML/CSS, WordPress

Backend: FastAPI, Django, Node.js, REST APIs, JWT, OAuth 2.0

Databases: PostgreSQL, MySQL, SQLite, Redis, ChromaDB

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Docker Compose, Coolify, Traefik, Linux, Git/GitHub, CI/CD

Testing & Security: pytest, Unit & integration testing, bcrypt, TOTP 2FA, OWASP Top 10

AI & Automation: LlamaStack, Ollama, RAG, AI agents, LangGraph, PySpark, n8n, Make, GoHighLevel, Webhooks

Methodologies: Agile / Scrum

EXPERIENCE

Coordenadas.co

Aug 2025 — Present

Full Stack Developer · Bogotá, Colombia (Remote)

- Unified two tools that forced duplicate data entry between payroll and tax withholding into Bikans, now in production with two-factor authentication.
- Delivered an n8n automation agent to integrate QuickBooks Online (OAuth 2.0) in 4 days across 5 phases and 17 tasks, fixing an authentication bug along the way without missing the deadline.
- Automated content distribution for 6 real estate projects into 1 reusable system, personalizing data per contact.
- Built custom plugins and API integrations for U.S. clients across 3 industries, and deployed and maintained project infrastructure on a self-hosted Linux server with Docker, Coolify and Traefik.

SELECTED PROJECTS

Bikans: Payroll & Tax SaaS

Production · app.bikans.com

Technologies: React, Django, PostgreSQL, TOTP 2FA

- A Colombian payroll and tax withholding SaaS in production with real users. I built the frontend, the admin panel and two-factor authentication for both domains.

API Auth Gateway

Production · Railway + Sentry

Technologies: Python, FastAPI, JWT, PostgreSQL, SQLAlchemy, Railway, Docker

- A FastAPI gateway that gives authenticated access to an external inventory API, with JWT-based ownership control.

IDN Homograph Phishing Detector

Thesis · USB Bogotá

Technologies: FastAPI, LlamaStack, AI agents, RAG, PostgreSQL, Redis, ChromaDB

- A multi-agent AI system that detects fake sites imitating known domains through lookalike-character substitution. Validated with 359 automated tests.

ETL Pipeline: Dow Jones Sentiment

Open source

Technologies: Python, PySpark, ETL, Pandas, Plotly, SQLite, Docker

- A complete PySpark ETL pipeline for sentiment analysis of Dow Jones news, with visualizations and multi-format storage.

TaskFlow: Team Productivity Dashboard

Production

Technologies: React, TypeScript, FastAPI, PostgreSQL, WebSockets

- A full stack dashboard that brings a kanban board, live CI/CD deploy status via webhooks and team notifications into one authenticated interface.

LedgerCore: Multi-Tenant Auth & Billing API

Production

Technologies: FastAPI, PostgreSQL, Redis, JWT, RBAC

- A reusable backend service with multi-tenant JWT authentication, role-based access control, subscription billing logic, rate limiting and automated tests.

Sentinel RAG: Source-Aware Assistant

Production

Technologies: Python, FastAPI, ChromaDB, Ollama, Embeddings, RAG

- A RAG pipeline that ingests documents, generates embeddings, retrieves relevant context and returns citation-backed answers. Evaluated against a retrieval-accuracy test set.

EDUCATION

Universidad de San Buenaventura

Jan 2021 — Present

Systems Engineering (in progress) · Bogotá · 10th semester

- Software architecture, distributed systems and networking.
- Thesis: multi-agent AI system for phishing domain detection.

COURSES & CERTIFICATES

- Ethical Hacking & Cyber Risk · Universidad Sergio Arboleda, 2025
- Mobile Application Development · Universidad Nacional de Colombia, 2023 — 2024

STRENGTHS

Technical ownership · Troubleshooting under deadline pressure · Async communication · Client communication across industries · Self-directed learning · Remote autonomy
